The Pinnacle Pursuits Experiential Learning Model

Our programs are grounded on the principles of experiential learning, a hands-on, action-based approach focused on learning by doing. In each of our activities participants have the opportunity to engage in an experience together, reflect on the experience, and discuss the value of their learning as it applies to life circumstances.

"I hear and I forget. I see and I remember. I do and I understand."

We Believe

“People don’t care how much you know, until they know how much you care.”

- Theodore Roosevelt

We believe . . . that in a world that is constantly changing in complexity, continues to grow in demands and expectations, and where a ‘disconnect’ with self, with others and with nature, is becoming more prevalent, the same innate desire continues to run through each of us: The need and drive to be curious, learn, connect with others, understand and be understood, feel valued among peers, trust one another, take risks, challenge ourselves, live and learn with purpose, and achieve. These qualitative experiences may be difficult to measure, but are essential in creating a positive impact on personal confidence, motivation, growth, happiness, and overall success in all areas of personal and social development. We believe that these are the most important qualities and values for both young people and adults, and thus for society and humanity as a whole.

At Pinnacle Pursuits, we dedicate our work and focus to the design and delivery of such experiences.

We hope you will join us in this meaningful pursuit of learning and possibility where everyone feels empowered and able to reach for and become their best self.
